MAXFORCE®

Professional Insect Control

Ant Killer Bait Stations

FOR USE IN COMMERCIAL INDUSTRIAL AND RESIDENTIAL AREAS

Effective Against Pharaoh Ants, Argentine Ants, Black Carpenter Ants, Florida Carpenter Ants, Red Imported Fire Ants, Carpenter Ants, Pavement Ants, Cornfield Ants, Odorous Ants, Acrobat Ants, Thief Ants, Crazy Ants

Inspectable Bait Stations

ACTIVE INGREDIENT:

Hydramethylnon: tetrahydro-5, 5-dimethyl-2(1H)-pyrimidinone, (3-(4-(trifluoromethyl)phenyl)-1-(2-(4-(trifluoromethyl)phenyl) ethenyl)-2-propenylidene) hydrazone.....1.00%
Other Ingredients:99.00%
TOTAL:.....100.00%

EPA Reg. No. 432-1252

EPA Est No. 071106-GA-001

CONTAINS: 24 Child-Resistant Bait Stations

U.S. Patent Nos. 4,163,102RE 29,358; 4,353,907; 4,087,525; 4,213,988 DES 278,842; 4,563,836; 5,271,180 and other patents pending.

CAUTION: KEEP OUT OF REACH OF CHILDREN

FIRST AID	
IF ON SKIN:	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact 1-800-334-7577 for emergency.	

Do not allow children or pets to play with the bait stations.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if absorbed through skin. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

Personal Protective Equipment (PPE)

Applicators and handlers must wear;

- Shoes plus socks

Follow manufacturer's instruction for cleaning/maintaining PPE. If no such instructions for Washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

User Safety Recommendations

User should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

User should remove PPE immediately after handling this product. Wash thoroughly and change into clean clothing.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Do not remove baits from container.

STORAGE: Store in original container away from heat.

DISPOSAL: If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused products down any indoor or outdoor drain.

GENERAL INFORMATION

General Precaution Restrictions

MAXFORCE® Ant Killer Bait Stations contain a patented bait formulation which kills Pharaoh ants and other common household ants: Pharaoh Ants, Argentine Ants, Red Imported Fire Ants, Crazy Ants, Acrobat Ants, Pavement Ants, Cornfield Ants, Odorous House Ants and Thief Ants. When properly used, MAXFORCE® will attract foraging worker ants to the bait station. The ants will feed on the bait, which contains Hydramethylnon, a delayed action stomach poison. Then, the worker ants will take some of this bait back to the nest, where they will pass it on to destroy the queen and the entire colony. MAXFORCE® will kill both adult and larval ant forms.

Do not use residual sprays with or near the MAXFORCE® bait stations, as the worker ants must remain alive to carry the bait back to the queen and immature workers. Residual sprays may cause worker ants to spread out and form secondary colonies. MAXFORCE® Ant Killer works because it is non-repellant and thus will not cause secondary colony formation.

MAXFORCE® Ant Killer Bait Stations has no insecticide odor, and it is child-resistant and easy to use. The patented bait station design allows you to inspect each bait placement and monitor the amount of ant feeding. It may be used for the control of ants wherever they are a problem (e.g., hospitals, nursing homes, day care centers, schools, residential establishments, warehousing and commercial establishments, food service, food manufacturing and food processing facilities, laboratories, computers and electronic equipment facilities, pet shops, zoos, buses, boats, aircraft, and trains.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Application Instructions

1. Simply place each bait station indoors or outdoors immediately next to ant trails or close to areas where ants are numerous. Nests are usually located in dark, humid and warm areas close to a water and food source. For maximum effectiveness in ant control the bait station should be placed in or near wall voids, electrical outlets (if wiring permits), potted plants, waste paper baskets, garbage cans and sinks.

Bait stations can be placed in cabinets, next to food and dishes, near sensitive equipment or anywhere your ant problem occurs.

2. Indoor Use: For normal infestations, you should use 3 MAXFORCE® Ant Killer bait stations in an average size room. For heavier infestations, you will need additional bait stations in each room. If infestation persists beyond two weeks, replace all bait stations where the bait has been completely consumed and relocate bait stations that show no evidence of ant feeding.

3. Outdoor Use: Bait stations should be placed near ant activity or anywhere ants may gain access to the structure. Application sites include air conditioning units, electrical conduits, vents, pipe chases, concrete slabs, skylights on roofs; around ant mounds, garbage cans, and trees; along walls, window sills, sidewalks and driveways; on ground around structure.

4. The bait stations can be stuck to a vertical surface by peeling off the bottom label to expose adhesive.

5. Do not spray the bait stations. Avoid placing the bait stations on freshly sprayed surfaces.

6. Increased ant activity may be seen near the bait stations immediately after placement for short periods but you can expect to see less activity within one week. After placement, ant trails may be observed between the bait stations and the nests. For best results do not interfere with the ants or the stations during their use because ants must carry the bait back to destroy the queen and colony.

7. Inspect all bait stations and replace as needed for continuous control of ants.

Total Net Weight: 1.27 oz. (36 g.)
