Household Uses - Attics, Garages, Sheds, and Enclosed Crawl Spaces Occupied for Less than 4 Hours Per Day
Kills flies and other insects as listed for up to four (4) months. Remove from sealed bag and hang or stand, out of reach of children and pets, in an open space of an enclosed area, away from windows. One 80 g strip will treat 900 to 1200 cubic feet which is about equal to an average room 10' x 13' with an 8-foot ceiling for up to four (4) months. In a larger room, if more than one strip is required, keep them at least 10 ft apart. Record the date of installation so that the old strip may be replaced with a new, fresh, full-strength strip at the end of the four (4) month period or when effectiveness diminishes. A

Animal Buildings Occupied by People for Less than 4 Hours Per Day

Controls flies, mosquitoes and gnats in horse barns, calf parlors, hog parlors, stables, poultry houses, tack rooms and dog kennels. Do not contaminate food, water or foodstuffs. DO NOT contaminate milk or milking equipment.

Milk Rooms Occupied by People for Less than 4 Hours Per Day

Controls flies, mosquitoes and gnats in milk rooms and bulk storage rooms. DO NOT contaminate milk or milking equipment.

Agricultural Commodities

Bulk storage of raw grains such as corn, soybeans, cocoa beans and peanuts. For control of stored product insects including Almond Moths, Cocoa Moths, Indian Meal Moths, and Mediterranean Flour Moths infesting non-perishable bulk-stored raw agricultural commodities. Calculate cubic feet of air space above the commodity to determine the number of strips required for treatment. Treat in early Spring before moths begin to emerge. Replace strip when needed to prevent egg laying by moths. Hang strips so as not to impede air circulation. When multiple strips are required, distribute them uniformly over the treated space.

Trash Dumpsters

For control of flies in garbage dumpsters, attach the strip (one strip treats 900 to 1200 cu ft.) inside dumpster. Keep lid on dumpster closed.

Catch Basins

To control mosquitoes breeding in catch basin, suspend one 80 g strip about ten inches above water level. Usual control lasts 10 to 15 weeks.

Enclosed Utility Boxes

To control Fire Ants, Wasps and other insects as listed which commonly infest utility enclosures, cabinets, conduits, junction boxes, and enclosed electrical panels. Remove from sealed bag and hang or stand so air can contact all sides of the strip. One strip treats 900 to 1200 cubic feet. Record installation date and replace when effectiveness diminishes.

Reptile Houses Occupied by People for Less than 4 Hours Per Day

For control of mites on reptiles in Reptile Houses: Hang appropriate number of 80 g strips per 1,000 cu. ft. for the space to be treated. Do not over treat.

How much space will one strip treat?

80 gram 900 to 1,200 cu. ft. 8' x 10' x 15' = 1200 cu. ft.

Always use the appropriate size and number of strips for the space being treated. If more than one is required, distribute them over the space equally.
